OILplan

The WEB-BASED system for managing separate waste collection

What is and how does the innovative OILPLAN system work

OILPLAN is a web-based system for managing and monitoring urban and industrial waste collection.

It is an Internet-based service accessible from a PC, Tablet or Smartphone that makes it possible to effectively manage waste drop-off and collection.

The system can be applied to various types of containers and to any type of waste, whether solid or liquid

The **OILPLAN** system is easy and intuitive to use and is utilized by waste collection companies, as well as local or municipal utilities to monitor the containers installed on the territory and simplify the collection of used oil (or other waste) while improving use of the service by residents.

Simply consult the **OILPLAN** system at www.raccoltaoliusati.com to find the nearest available drop-off container.

The container "anonymously" manages drop-off by authorized users, identifying them through a unique ID number stored on an LF Tag, UHF or other (the containers must be enabled for the chosen Tag type).

The drop-off data is stored by the container and later sent to the **OILPLAN** system for processing.

This detailed process will generate accurate statistics on the collection project, determine the best locations for positioning the collection stations, and reward users based on drop-off.

colibri

Container for used vegetable cooking oils

Filter the used oil when filling

Small, handy and compact, ideal for those having little room

COLIBRI is a 1.6 litre container for the separate collection of domestic used vegetable cooking oils.

The capacity is ideal for the collection of salad oils or shallow frying oils.

Manufactured from lightweight HDPE and easy to handle, it includes a child proof safety cap (UNI EN ISO 8317: 2005 compliant) and a removable filter located in a recess in the opening, to improve the quality of the separated oil.

Its small size allows easy placement within a sinks for practical oil collection and storage in a cupboard or kitchen worktop.

The cap is designed for the insertion of a microchip, for data monitoring of oil collection.

Optional:

A panel for vinyl labels or imprinting e.g. customer's logo. Insertion of a microchip into the cap.

Tank for the collection and storage of Vegetable oil from industrial canteens and From the catering sector

It simplifies the disposal of waste cooking oil coming from fryers

ECO-WORK® is a versatile and convenient tank designed for the collection of big quantities of Waste Vegetable Oil.

Thanks to its features the collection and storage of oil is safe, easy and quick, directly on the workplace. **ECO-WORK®** has a maximum capacity of 36 litres, is wheeled and has a trolley handle that makes its transport extremely safe also for the health of the carrier.

It is available in green for the selective collection of vegetable OIL. It also has a central handle to lift it and stack it * making the most of any available space. Its versatility allows oil collectors to suck oil directly on the spot or to take it to specific collection and/or storage centres. The transport is absolutely safe and easy thanks to a specific casing that safely fixes **ECO-WORK®** through some belts preventing its overturning.

*** Maximum stackable quantity allowed when full: n° 4 pieces for a total of 144 litres.**

The trolley handle makes any move easier even when full

If can be stocked for a better positioning (maximum stockable quantity: 4 tanks). Easy and safe fastening through loading fixing belts

Optional:

Customizable plates, customizable stickers.

COLLECTION POINT H-Oli

article with CE Certificate

For separate communal collection of domestic Waste vegetable oil

Equipped with integrated filler and float level gauge

H-Oli is a container for the communal collection of used vegetable cooking oil from apartment blocks and other public collection points. The drum is made in weather-resistant HDPE, it is washable and recyclable at the end of its useful life.

The container is provided with a **H-Oli** lid for practical and safe collection of used vegetable cooking oils.

The filling aperture includes a wide funnel with recessed filter and an anti-spill safety valve to reduce and stop the flow, in the event of accidental overturning, it also prevents overfilling.

It also has an optional odour filter (lasting approx. 2 years) and a float level gauge. The **H-Oli** collection container is supplied with a secondary lid that makes the container UN/RID/ADR approved for safe transport.

Large opening for easy oil filling

Optional lock with universal key

Optional:

H-Oli Kit, Oil Only 120 Platform, lock with universal key, vinyl labels.

Container blue color

Container for separate collection of used Vegetable oil

Completed with NCP cover and level gauge

Supplied with coded key closure

Large fill cover

Installation at a supermarket

Installation at a material collection point

Installation in an open green area

OLIVIA[®]200 consists of two containers, one inside the other.

The outer container approximately 500 litres, is made from oil and weather resistant HDPE. It is pressure washable and has a lid with a slam lock with coded key and lid support props for easy internal inspection.

The inner corrosion resistant steel container has a capacity of 200 litres, a large opening for oil collection and a watertight clasp-sealed lid with oil resistant gasket. It can also be transported by road because it is authorised by UN/RID/ADR and approved for safe transport.

It has a float level gauge with an analogue display dial and a manually opening lid with automatic closure and includes a ventilation and carbon odour filter (lasting approx. 2 years) to deter flies and rodents.

It also has an anti-roll bar, a funnel to facilitate oil collection and a safety float valve, to prevent spillage in case the container is accidentally overturned or overfilled.

Available in version:

OLIVIA cod. OV-60.000C – To be positioned near highways, pavements or at strategic points accessible to the public, it is supplied with an integrated roll-bar and can be anchored to the ground with suitable bolts (not included) to resist strong winds weather and accidental knocks that might otherwise tip the container over. It also features a yellow 100x40 cm banner signage panel with green lettering.

OLIVIA NEW cod. OV-60.000D – Ideal for placement in public places, it is supplied with two bars to protect each side and anchoring for secure ground fixing with suitable bolts (not included) to resist strong winds that might otherwise tip the container over. It also has a signage panel for vinyl labels.

NON-SLIP PLATFORM OIL ONLY 120

Oil Only 120 non-slip Platform for H-Oli collection bunker

Optional wall fixing plate

Identification sign

Extra safety with non-slip adhesives on romps

The **OIL ONLY 120** non-slip grid platform is designed to increase user safety for access when filling the H-Oli Collection bunker with used vegetable oil from domestic containers, such as the **OLI** and **ECOHOUSE** containers.

The platform is manufactured from pre-galvanized sheet steel, with accessories in hot-dip galvanized steel to provide excellent weather resistance and it includes holes for anchoring the platform to the ground.

In the event of any accidental oil spillage, the grid together with three non-slip ramps, guarantees safe pedestrian access to users.

The platform has special high oil absorbent yet water-repellent pads for rainwater diversion from holes in the bottom of the tray, in order to avoid water stagnation and unpleasant odours and insect infestation.

* The absorbent capacity of the pads is about 1.2 litres each, for a total of 12 litres per platform.

Replacement of the pads should be carried out in the event of any major spillage (max. approx. 10-12 litres) and used pads must be disposed of according to environmental regulations in force.

Optional:

Wall fixing plate (bolts not included).

**Funnel for
collection of
used cooking
& frying oil**

Features convenient side grip and large aperture for pouring the oil

Funnel bottom adoptable for use with various types of reused bottles

GOCCIOLINA is a funnel for the collection of used domestic cooking and frying oil.

Designed to facilitate the easy filling of used oil from pan to a re-used bottle; it has a wide aperture and a removable preliminary filter to prevent clogging.

To contain odour, **GOCCIOLINA** has a hinged lid, which is removable to facilitate cleaning. The flat lid may be silk screen printed or have a vinyl label attached. The design of the bottom of the funnel makes it adaptable for use with different types of bottles on the market, from small half-litre PET bottles to bigger ones with wider necks.

The lid is also provided with a special seat that retains the bottle cap used for collection so that it can be reused to close the bottle once it is full. The cap holder also allows you to store caps with different diameters.

Equipped with lodge cap

particular closure

Optional:

Vinyl labels, silk screen printing for customisation.

Available in several colour variations.

Nuova *C*.Plastica s.r.l.

Nuova C.Plastica s.r.l. is a company specialized in the manufacture of molds and in technical blow and injection molding of plastic materials.

Established in 2000 from the merger of the parent companies C.Plastica s.n.c. and C. Camoli s.n.c., present on the market since 1960, it boasts over 58 years of experience. This has enabled the company to adapt well to the continuous evolution of the business world and develop specialized departments in various molding sectors such as: automotive, motorcycles,

household appliances, sports, interior design and more. In addition to being certified UNI EN ISO 9001:2008 (Reg. No: 9137-A) the company is also certified to manufacture parts for the containment and transportation of both liquid and solid hazardous materials (IMDG certification).

The experience gained has enabled Nuova C.Plastica, **which has always been sensitive to environmental concerns**, to **create an Environmental Division** which, for over 15 years, has been engaged in designing and manufacturing containers for the separate collection of vegetable and mineral oils as a solution to these important issues. All entirely made in Italy.

The range of services offered by Nuova C.Plastica has become broader in the past few years to also include an in-house advertising design and adhesive label printing service. This service, which originally took care of the graphic personalization of the containers for the separate collection of oil and for the creation of ad hoc advertising campaigns for waste collection awareness, has now evolved and aims to provide complete design services for any type of business.
